

**Deutsche Telekom:
T-View 100 PC Professional Edition.
Bonn 1999**

At CEBIT '99, Deutsche Telekom is presenting a further development of the PC-supported video telephony application "T-View 100". The new "Professional Edition" integrates on the computer video telephony and additional telephony features along with joint editing of Windows documents (application sharing) via ISDN. One major advantage of the system is its ease of installation, as videocapture and sound cards are already integrated on the ISDN card supplied. Minimum PC requirements: Pentium processor with at least 166 MHz and 16 MB RAM, operating system Windows 95/98/NT4.0.
